The Freedom to Choose and Build the Right Solution

Most solutions have restrictions when it comes to product compatibility or expansion. Solis empowers you to design your site however you see fit to ensure maximum power and savings.

- Work with a variety of battery, rapid shutdown, and module-level power electronics.
- Easily add on storage, more inverters, or solar at any time to meet growing needs
- Save time and money with optional optimization and UL3741 listed products
- Stay connected, troubleshoot and resolve issues easily with SolisCloud monitoring platform
- Remotely support high-powered modules and update firmware while also enhancing production time frames with better operation windows.
